All our portrait prints under this category are printed on the Durst Lambda printers which give unrivalled quality and a hint of the hand-printing quality of the bygone age of printing from film.

Matted prints come with a 2" white beveled edge cut art mount board, ideal for giving as presents.

Framed prints the sizes quoted are for the prints, we mount the prints on to boards with an overall 2" (approx.) bevelled edge. The frames use the highest quality durable mounting materials as seen in many art galleries thus protecting the print for years to come, while at the same time reducing the impact of the process on the environment.

Block Mounted prints are finished with a flush edge on 18mm block board. They have a contemporary look for clean cut presentation, so the image gives maximum impact. They are finished with matt film to protect the print from environmental damage.

Digital Files Only Service

All files from the portrait session on CD £300

Graded Printing Service

Prints from your files which will be graded and colour calibrated prior to printing, unlike the in-store printing services. They are printed on profiled professional printers and display true colour on lustre or glossy.
